

Copper Rain Chain Links

Rain Chains have been used for ages. They bring a unique beauty to our homes. They provide the soothing sound of a gentle brook. They provide an attractive way to channel rainwater into gardens and collection devices such as water harvesting barrels.

With water being so valuable here, it's critical that we control and capture our rainwater runoff. No longer do you have to let the water from your rooftop fall uncontrolled to the ground. These products allow you to control your falling water from your gutter even if the wind is blowing!!!

They break the fall of water, guiding it visibly downward through the design of your choice.

These products are made from high-quality, thick copper. Lengths are available from 4 to 20 feet.

"Extra Link" Copper Chain #3132

In pure solid copper, this link chain features an extra link inset into the chain. It exhibits excellent water flow characteristics for a link-type chain..

Double Loops #3130-2

Double Loops have a distinctive visual appeal and are at their best in limited flow situations so splashing can be controlled. They are constructed of unfinished pure copper.

Large Copper Links #3131

Solid chain links represent a simple, understated method of channeling rain flow in the traditional manner. This chain is thick pure unfinished copper and hard to find anywhere else.

The Rain Well

Zen Loops™ Copper Rain Chain #6886

Our newest rain chain is a modern loop of our own design in pure, thick copper. The vertical bars help water flow downward -- superior to double loop designs.

Link and Loops Copper Rain Chain #3133

This new exclusive design combines a copper link with a miniature "double loop" in between -- a beautiful combination! Comes in unfinished, pure copper.

Oval Loops Copper Rain Chain #3138

Oval Loop copper rain chain. Elongated loops in pure, unfinished copper are our newest variation of the double loop design.

Infinity Links #3134

The Infinity Link is a new, exclusive rain chain design. Its graceful curves will enhance any home. Comes in unfinished, pure copper. Medium water flow tolerance.
