

Iron, Brass, and Aluminum Rain Chains and Links

Rain Chains have been used for ages. They bring a unique beauty to our homes. They provide the soothing sound of a gentle brook. They provide an attractive way to channel rainwater into gardens and collection devices such as water harvesting barrels.

With water being so valuable, it's critical that we control and capture our rain water runoff. No longer do you have to let the water from your rooftop fall uncontrolled to the ground. These products allow you to control your falling water from your gutter even if the wind is blowing!!!

They break the fall of water, guiding it visibly downward through the design of your choice.

These products are made from high-quality, thick iron, aluminum and brass materials. All cup styles have open bottoms for efficient water flow even in heavy rainfall. Lengths are available from 4 to 20 feet.

IR 503 Iron Flower Cups

Here is our classic flared design in a hand finished iron cup. Iron is very stiff and far less expensive than copper, with a hand-applied bronze finish. Comes with a gutter attachment piece.

Please Note: Iron will eventually rust. This is a new product, and we do not guarantee the product against rust, corrosion, pitting and changes to the finish over time.

3114-B Brass Cups

Talk about an eye-catcher! This unique chain of solid brass cups is able to gracefully pass heavy rain flow. The brass is uncoated and will beautifully darken over time.

XL Scallop Cup Aluminum Rain Chain - 3104-AL

This is the LARGEST cup style rain chain on the market - each cup is over 4 inches across by 5 1/2 inches in length! For durability and strength, the connecting wires are made of stainless steel! This rain chain will handle heavy water flow conditions. Cups are made of pure aluminum. (Please note that aluminum does not age and acquire patina finish like copper does.)

Flared Cups Aluminum Rain Chain - 7228

An aluminum version of our popular flared cup design. The sides are hand-hammered for a beautiful effect. Lightweight and strong, this chain will last for many years. (Please note that aluminum does not age and acquire patina finish like copper does.)

Aluminum Rain Chain Links - T4

This link rain chain is made of aluminum! Lightweight but stiff and thick, this inexpensive chain will add a designer look to your gutter system. Medium grey.

Aluminum Extra Link Rain Chain Links – T5

This rain chain is made of aluminum! Lightweight but stiff and thick, this inexpensive chain will add more depth as it has an extra link. Medium grey.

Large Brass Link traditional rain chain #3131-B

Our solid brass chain links are perfect for the understated, simplest, elegant chain in keeping with original Japanese intent. Hard to find chain like this anywhere else. Very popular as an architectural element. Comes in unfinished, pure brass.

Butterfly Links™ #0060

Delicate butterflies hand-crafted in pure brass are strung together to make this beautiful chain. Will age to a dark golden brown.

Like all of our chains, comes with a brass V-hook for easy installation
