

Rain Chains Accessories

Rain Chains have been used for ages. They bring a unique beauty to our homes. They provide the soothing sound of a gentle brook. They provide an attractive way to channel rainwater into gardens and collection devices such as water harvesting barrels.

With water being so valuable, it's critical that we control and capture our rain water runoff. No longer do you have to let the water from your rooftop fall uncontrolled to the ground. These products allow you to control your falling water from your gutter even if the wind is blowing!!!

They break the fall of water, guiding it visibly downward through the design of your choice. These products are made from high-quality, thick copper and aluminum materials.

Hand Hammered Copper Dish with Attachment Loop #3145-A

This variation on the popular Copper Dish is designed specifically to

be under your

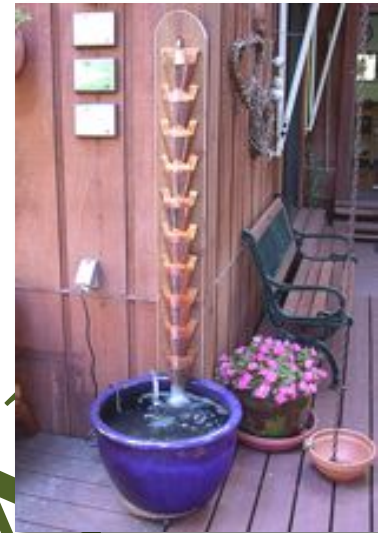

rain chain! With a solid brass loop in the center, you can easily secure your chain to this beautiful terminal point. Fill it with pebbles or plant it with ground cover for a gorgeous effect! 16" in diameter, 3" high.

Flat-Surface Funnel Cups™ #4343

For buildings with no eaves and other flat surface applications (like fountain elements), these overlapping, pure copper funnels make a spectacular waterfall effect! With minimal splash characteristics, these come in a pack of 10, which provides approximately 4 1/2 feet of vertical coverage. Attachment screws not included (#10 brass recommended).

Copper Installation Kit RCR-1

This is the perfect accessory to make your rain chain installation easy and work perfectly! This reducer drops into the gutter outlet (An additional sleeve is provided for larger diameter gutter outlets). Use at any existing gutter outlet or make your own outlet in the gutter with a 2-1/4" to 3" hole saw. Your rain chain hangs from the bolt at the bottom. The water is directly downward onto the rain chain for maximum water flow efficiency! Made of pure, thick copper that will age beautifully

Aluminum Installation Kit RCR-2

A version of our standard Installation Kit, produced in Aluminum. This is the perfect accessory to make your rain chain installation easy and work perfectly! This reducer drops into the gutter hole (An additional sleeve is provided "just in case" for larger gutter openings). Your rain chain hangs from the bolt at the bottom.
