

The Rain Well RB80g Emerald and Chocolate Rain Barrel

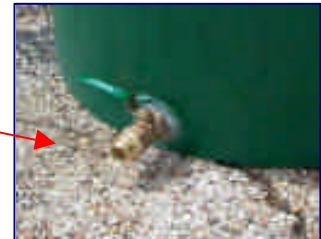

The RB80g rain barrel has all of the essential elements plus extra features for effective rainwater collection, storage, and distribution. This rain barrel holds 80 gallons and has a reinforced “flat” back that fits nicely against walls. The RB80g rain barrel is available in two solid colors, Emerald and Chocolate. These rain barrels are decorative and will complement any home and landscape. Two models are available, the standard RB80g and the RB80g Deluxe. The Deluxe model has a butterfly drain valve in a durable brass housing with garden hose threads (GHT) at the very bottom that easily connects to a garden hose. The Deluxe model also has an Acetyl garden spigot that is 16 inches above the bottom. This allows one to fill up a watering can or a bucket to be

used to water indoor and hanging plants and can also be used for

washing vehicles. The standard model has a zinc garden drain valve. Both models include an internal overflow tube that drains to the bottom of the barrel. A secondary overflow is optional

Primary overflow inside that drains to hidden overflow outside

that can be used to link to a companion tank. The lid is attached with four thumbnuts and is easy to remove for cleaning. The lid has reinforced screened inlets, which keeps out mosquitoes, insects, organic debris, and

small animals. The RB80g is available with an optional strainer basket. An added feature of the Deluxe model rain barrel is that it will collect and store rain and melted snow in the wintertime without damaging the drain valve when the stored water freezes! The RB80g is warranted for one year. The RB80g is built with UV protection additive and is FDA approved for potable water.
