

The Soft Cistern by THE RAIN WELL

The Soft Cistern is durable, rugged, and lightweight. This cistern is an excellent alternative for polyethylene tanks for water storage purposes. The Soft Cistern can be easily folded allowing for compact packing for inexpensive shipping. Shipping costs for polyethylene tanks larger than 100 gallons can be up to half of the cost of the tank itself! Because of the Soft Cistern's compact size when shipping, the shipping cost is based on weight, not on volume, which makes shipping costs much less.

Water storage usages include **rainwater harvesting, fire suppression, water conservation, irrigation, gray water, livestock water, swamp cooler bleed valve run off, river & ditch water storage**, and any other non-potable uses. This cistern can be used for either outdoor or indoor use and can be easily placed in crawl spaces, cellars, or basements. It easily goes where hard polyethylene tanks cannot go. For large rainwater storage capacity in your backyard or in remote areas, this cistern is the right choice when there is no easy means to transport a polyethylene tank to where you need it.

The Soft Cistern is easy to ship, easy to setup, easy to carry, and easy to use! Easily connects to the 1-1/2" overflow outlets of the Aqua Fria, Cubo, and Peso rainwater harvesting tanks. These tanks pre-filter the water that enters the Soft Cistern. Capacities available are 233 and 467 gallons. 1000 gallon tanks are also available.

Specifications

| Capacity | Height | Width | Length |
|-------------|--------|--------|--------|
| 233 gallons | 30 in. | 60 in. | 30 in. |
| 467 gallons | 30 in. | 60 in. | 60 in. |

| Capacity | Footprint |
|-------------|-----------------|
| 233 gallons | 60 in. x 30 in. |
| 467 gallons | 60 in. x 60 in. |

Available Colors

- Teal
- Light Blue
- Dark Blue
- Red
- Yellow
