

Themed Rain Chains

Rain Chains have been used for ages. They bring a unique beauty to our homes. They provide the soothing sound of a gentle brook. They provide an attractive way to channel rainwater into gardens and collection devices such as water harvesting barrels.

With water being so valuable here, it's critical that we control and capture our rainwater runoff. No longer do you have to let the water from your rooftop fall uncontrolled to the ground. These products allow you to control your falling water from your gutter even if the wind is blowing!!!

They break the fall of water, guiding it visibly downward through the design of your choice.

These products are made from high-quality, thick copper. Lengths are available from 4 to 20 feet.
